

In Your Home, Office, Business or School Filtered Air is Healthier

Fewer Allergens and Odors!

What Goes In Your Body Has a Big Impact on Your Health

The Purifan is a patented, 2,000 CFM air cleaner that installs exactly like a ceiling fan. It filters all the air in a 20 x 20 x 8 foot room through five-stage filters every 90 seconds. That is 40 air changes per hour to remove allergens, dust, smoke and odors.

Purifans are ideal for homes, offices, day-cares, schools, nursing homes, medical offices, pet stores and any business with a dust, allergy, smoke or odor problem.

Take charge of the quality of the air you breathe at home, in your office and school.

What Causes Asthma?

A child's lungs are very sensitive to allergens, dust and contaminants that are common in the air in homes, day-cares and schools.

Breathing these fine particles wears down their respiratory system. These particles get trapped in respiratory tracts, sinuses and ear canals. Repeat ear or respiratory infections can be a warning sign your child may develop Asthma, the number one chronic illness in children.

Purifans filter out 90-95% of these harmful allergens, and have reduced sick days in elementary schools by 61%. You wouldn't let your child eat poisons, don't let them breathe these harmful contaminants either.

A MESSAGE FROM OUR OWNER AND PRESIDENT

At Lindhart Technical Services, we know the importance of filtering harmful allergens out of the air. That is why when we saw the Purifan Clean Air System's performance, we signed up to be a Certified Purifan Dealer. Upgrade your ceiling fan to a Purifan, you will be glad you did.

All homes, schools and businesses would be much healthier when the air is filtered 40 times each

hour. Purifan is the only air cleaner we know that produces so many air changes per hour.

Purifans are totally quiet, very effective, low cost and the filters last 9 to 12 months in non-smoking homes. We offer no-risk 7-10 day trials in your home or office, call us to set up your installation. We know you will feel the improvement.

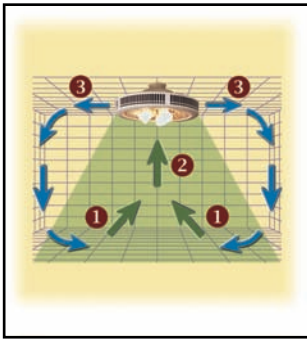

Don Lindhart - Owner

MAKE THE AIR IN YOUR HOME, OFFICE, DAY-CARE OR SCHOOL HEALTHIER

THE PATENTED PURIFAN'S UNIQUE DESIGN IS WHY IT WORKS SO WELL

Schools Two Purifans per Classroom

Airflow is a key to why the Purifan captures more dust, allergens and odors.

Purifan is a great air cleaner for some very simple reasons. Sometimes the best way to solve a problem is the safe, low-cost and simple. Purifan is a great example that sometimes simple is better.

1. Purifans use safe, effective 5-stage filter media and activated charcoal to filter the air up to 40 times per hour in a 20 x 20 x 8 foot room.

2. Purifans produce no dangerous ions or ozone that the EPA says can be harmful to your health.

3. It is in the ideal location, the ceiling, to cover the entire room.

4. The Purifan creates a unique air-flow pattern that pushes clean, filtered air to every corner of the room, and pushes

the dirty, particle-filled air back to the Purifan so it can pull it back into the unit and particles out of the air.

5. The Purifan rotates at a very quiet 200-240 RPM compared to air cleaners that use small fans that sound like a vacuum sweeper motor on higher settings.

6. The Purifan produces the proven energy-savings air flow you get from a ceiling fan in a room. Saves on cooling and heating costs.

7. Purifans use only 1/2 amp of energy, about 60 watts.

8. Purifans filter 24/7 even when your HVAC is not running.

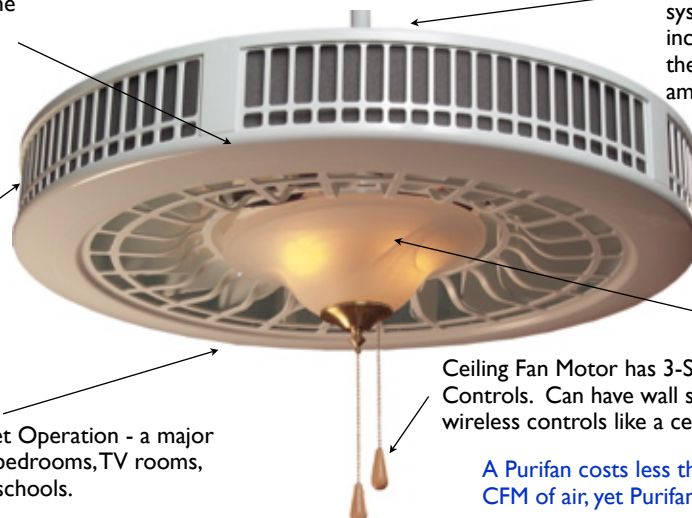

Very few trial customers return their Purifans. They can tell the difference in the air in 24 hours. They breathe easier and the air smells better and lighter.

PURIFAN HAS EARNED ELEVEN PATENTS

Rugged Design has a Lifetime Warranty - The entire unit spins at 200-225 RPM like the blades of a ceiling fan.

Easy-to-change hidden filters capture dust, pollen, mold and odors, last 9-12 months in most homes - MSRP \$40

Totally Quiet Operation - a major benefit for bedrooms, TV rooms, offices and schools.

Purifan uses a ceiling fan motor and mounting system. You can use 3/4 inch down-rods to lower the Purifan. It uses 1/2 amp or 60 watts

Filtered Air goes in all 360 degrees delivering fresh air to every part of the room. Moves and filters 2,000 CFM of air like a ceiling fan.

Optional light kits can add class and style.

Ceiling Fan Motor has 3-Speeds and Light Controls. Can have wall switches or wireless controls like a ceiling fan.

A Purifan costs less than ionic stick models that filter only 15-20 CFM of air, yet Purifans filter 100 times more air per minute.

DO YOU STILL HAVE A SMOKER IN YOUR HOME OR OFFICE?

Purifans are ideal for households with smokers. The Purifan is used in Casinos, Bingo Halls, Bars, Restaurants and Clubs. So it is a great product to put in a home with a smoker. It is a common occurrence for middle age children to buy Purifans for their parent's home, to reduce the odors that bother grandchildren's asthma or allergies.

MAKE THE AIR IN YOUR HOME, OFFICE, DAY-CARE OR SCHOOL HEALTHIER

THE AIR IN YOUR HOME HAS DECAYING SKIN CELLS, DUST MITES, POLLEN AND MOLD

Allergies can be a terrible curse on someone's life and their health. They can cause daily headaches, congestion, runny nose and itchy eyes. They take medicines that deteriorate their performance at work or school. They don't sleep well, which also has an impact on their performance at work or school.

Scientific studies and the CDC report it takes at least 12 air changes per hour to reduce or eliminate allergy symptoms. The Purifan can provide 40 air changes per hour in a 20 x 20 x 8 foot room.

Purifan uses safe filter media and activated charcoal to reduce odors and gasses. The Purifan is quieter than a ceiling fan, but still provides the air motion of a ceiling fan.

Purifans are also sold as a floor standing models that look like a pole lamp and are 7 feet tall. This model is ideal for high ceilings, offices, hotel rooms or older homes where installing a ceiling fan could be expensive or problematical.

The Purifan is a great addition to anyone's bedroom, children's room, TV room, kitchen, pet

area or basement. They work great on pet dander and odors and even on cigarette smoke odors.

Purifan customers typically start with one unit in their bedroom to get 7 hours of fresh, filtered air.

Customers love the way Purifans reduce household dust. Those with allergies can report significant improvements in their health. Some report that spouses and even pets stop snoring. People also install Purifans in TV room, kitchens and basement areas.

COMPANIES ARE INVESTING MORE IN OFFICE WELLNESS PROGRAMS

Many Companies and Businesses are interested in Employee Wellness Programs to

keep employees healthy, at work and lower their use of health care insurance programs.

The Purifan Office Wellness Program can reduce employee absenteeism up to 50% in some offices. Employees feel better and perform better. In shared offices cubicles, Purifans can reduce the spread of common contagious illnesses like seasonal colds, flu and respiratory illnesses.

The payback to a company can be substantial when all the cost savings are considered.

Employees who feel better and avoid illnesses will use less health care, lowering the costs that drive up the insurance premiums every year. We have reports of 70% less inhaler use, and employees who stop taking \$500 per month worth of allergy medicines after the Purifans were installed.

Even computers, copiers and LCD projectors perform better and last longer if you reduce the dust that clogs them up and causes heat and performance problems in common office technology.

INDOOR AIR IS A KEY CONTRIBUTOR TO ALLERGIES AND ASTHMA

Many studies have proven that reducing exposure to microscopic airborne allergen particles can eliminate allergy and asthma symptoms. In public schools, installing Purifans help reduce sick days for students by as much as 61%. Inhaler use dropped by 70% and students test scores went up the first year. Children who feel better learn more in school.
