

Reduce Employee Allergies, Illnesses and Health Care Costs With Cleaner Office Air

OFFICE AIR QUALITY

Call Centers, Professional & Medical Offices, Clerical Centers

Does sharing the air in your office make your employees sick, miss work and drive up your healthcare costs? Yes it does!

The Purifan Clean Air System is easy to install in any office, even rented offices, and can even be moved to new offices. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans make any office or business a healthier place for all your employees and visitors. Low-cost, energy-efficient Purifans are professionally installed, cleaned and serviced by our Certified Local Dealers.

Benefits of Cleaner Office Air

Reduce your office absenteeism with cleaner indoor air quality. Respiratory related illnesses are the number one cause of employee absenteeism and healthcare costs.

Absenteeism can be reduced by as much as 50% which will typically improve productivity and profits.

Savings generated in just a few months will return more than your investment. Purifans will pay-off for your business for many years with their lifetime warranty.

Employee sick-days cause projects and work-flow delays reducing companies revenues and profits.

Shared office areas, like schools, have much higher levels of allergens and related illnesses. The ACAAI* studies show people with allergies and bronchitis make more data entry errors and have more on-the-job accidents. *American College of Allergy, Asthma and Immunology, ACAAI

Improve office productivity because employees who feel better, sleep better and use less over-the-counter or prescription drug medicine will perform better. *ACAAI

Cleaner indoor air quality will reduce the spread of common colds, influenza and other respiratory illnesses that are sometimes transferred by airborne droplets. *CDC

Lower health insurance costs by reducing respiratory illnesses like allergies and asthma that cause more than half of most employees health care expenses.

*Blue Cross and Blue Shield

Lower heating and cooling costs. Eliminates hot or cold spots. Rooms feel more comfortable.

Reduce most common office odors, fumes, gasses and chemical odors. Helps employees feel better.

Less dust that harms computers and equipment.

ReOrder Form OQSS - 062007

Reduce risk of catching illnesses from visitors

What Owners and Office Managers say about Purifans

"The Purifan made an immediate improvement in the way the office smelled and felt. Before they had installed the third Purifan we made the decision to install more units in other office areas. The change in the way the air felt was very dramatic. When 30 call center employees share the same air, it just feels heavy and has an odor. Purifans solved our air quality

problem and we strongly recommend Purifans to other companies.

Ray Naeini
Call Center Owner
Enid, OK

According to the U.S. Department of Energy (DOE), improving buildings and indoor environments could reduce healthcare costs and sick leave and increase worker performance, resulting in an estimated productivity gain of \$30 billion to \$150 billion annually. The DOE further estimated the potential decrease in adverse health effects from improvements in indoor environments to be 10 percent to 30 percent for infectious lung disease, allergies and asthma; and 20 percent to 50 percent for Sick Building Syndrome symptoms. Whether a building is old or new, the same recirculated air is breathed again and again by the people working in these buildings.

American Lung Association Website

"Who would believe Purifans could cut absenteeism in our school by 61%. Average number of sick days for students dropped from 18 to 7 days. Test scores jumped and everyone felt the difference immediately."

Clay Guthmiller
Supt. Leavenworth Schools
Leavenworth, KS

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
