

MAKE YOUR SCHOOL A HEALTHIER PLACE FOR TEACHERS & STUDENTS

CLEAN AIR PTA PROJECT PURIFANS FOR YOUR SCHOOLS

A Great PTA Project to Improve Your School's Indoor Air Quality.

Poor Indoor Air Quality is creating serious health issues in schools. But schools can dramatically improve air quality by filtering the air using the patented **Purifan Clean Air System**.

We are asking PTA groups to consider the **Clean Air PTA Project for their school**. This project can be implemented on a classroom by classroom bases and will save sick days for students and teachers for years to come. With the rising levels of allergies and Asthma in children, cleaner classroom air can provide substantial payback to families and teachers. No other PTA project offers such important, valuable and lasting benefits for every student and teacher in the school.

Benefits of Cleaner Classroom Air

Decrease student and teacher sick days by as much as 60%. This can increase attendance-based school funding.

Reduce symptoms including allergies and asthma, headaches, scratchy throat, congestion, watery eyes, itchy skin, coughing and sneezing.

Help students reduce their reliance on allergy medications that have side-effects including drowsiness, behavioral changes & lack of concentration.

When students feel better they will learn more, perform better and score higher on tests.

How The PTA Program Works

Contact Purifan for information and pricing.

We develop a plan with the school & PTA/PTO to raise funds to equip classrooms with Purifans.

School District must agree to install the systems.

Purifan will deliver and install the Purifans. Filters are \$40 and changed 2 times per year.

The PTA/PTO can add more classrooms as funds are available.

Lifetime Warranty. Free Trials are available in your classrooms to let you evaluate the Purifan.

Cleaner air reduces illness and sick days

The PTA Clean Air for Kids Program Offers Lasting School Value

"Our first tests in 2004-2005 proved cleaner air could make a huge improvement in the health and performance of students and teachers, but schools just don't have the funds needed. Our goal

is to help schools raise the funding from PTAs and PTOs. We also work with the school district to fund more Purifans in classrooms. Cleaner Air in schools will increase attendance which typically increases state funding to the general school operating budget."

Stan Brannan, President Purifan, Inc., Wichita, KS

"Our absentee rate hovered near 10 percent. Under the "No Child Left Behind" mandate, we are required to maintain attendance at 90 percent or above. Anything we can do to help keep our children healthy and in class is a plus for everyone. We installed 54 Purifans throughout our entire school. Students and teachers feel better. Inhaler use dropped over 70%. Our teachers have used 50% fewer sick days. Our attendance went from 90.2% to 96.48%, a 61% drop in student sick days. The savings in student and teacher health costs and missed work costs for parents is enormous."

**Jan Cox, Principal
Howard Wilson Elementary
Leavenworth, Kansas**

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces pet dander, odors, dust, pollen, mold spores and other common allergen particles by as much as 90%.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
