

TEACHERS  
GIVE THEIR  
PURIFANS  
AN A+

**Does the air in your school make the grade? Poor Indoor Air Quality is creating serious health issues in schools.** But schools can dramatically improve poor air quality by filtering the air using the patented **Purifan Clean Air System**.

The **Purifan Clean Air System** is the Ideal Indoor Air Quality Solution for Schools. Air is driven through Purifan's five-stage filter system to capture particles and odors, channeling clean, healthy air back into the room. Two low-cost Purifan Clean Air Systems will filter all the air in a typical 800-square-foot classroom up to 40 times per hour.

## What Educators are Saying About Purifan™

*"Just a note to tell you how much we use and appreciate the Purifan that you installed in our facility. It is very important to us that we offer our children an environment that is as free of particles and dust, as we can*

*manage. We have tried several other methods to achieve this, but nothing we have tried, so far, matches the performance of your remarkable fan."*

**Carol Eklund**  
Preschool Director  
Montessori Children's House  
Phoenix, AZ

*"Our absentee rate hovered near 10 percent. Under the "No Child Left Behind" mandate, we are required to maintain attendance at 90 percent or above. Anything we can do to help keep our children healthy and in class is a plus for everyone. We installed 54 Purifans throughout our entire school. The difference is more than a visible lack of surface dust. Inhaler use dropped over 70%. Our teachers have used 50% fewer sick days. Our attendance went from 90.2% to 96.48%, an average of 11 fewer sick days per child. Our NCLB test scores improved the first year. We are so excited with the results."*

**Jan Cox**  
Principal  
Howard Wilson Elementary  
Leavenworth, Kansas

## Benefits of Cleaner Classroom Air.

**When students feel better they will learn more, perform better and score higher on tests.**

**Increase attendance-based funding by reducing sick days by as much as 60%.**

**Reduce symptoms including allergies and asthma,** headaches, scratchy throat, congestion, watery eyes, itchy skin, coughing and sneezing.

**Help students reduce their reliance on allergy medications** that have side-effects including drowsiness, behavioral changes & lack of concentration.

**Reduce the number of allergens,** mold spores, and pollen inside the classroom.

**Lower the spread of shared sicknesses** like flu, colds and other contagious illnesses that ride on these invisible floating airborne particles.

**Lower the risk of permanent lung damage that is** caused by breathing these particles.

**Lower heating and cooling costs.**

**Lower medical health insurance costs** for students and teachers.

**Reduce odors,** fumes, gasses and other airborne volatile organic chemicals.

**Less classroom dust** will protect expensive computers, smartboards and other technology.

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

### 5-Stage Advanced Filtering System

Reduces pet dander, odors, dust, pollen, mold spores and other common allergen particles by as much as 90%.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

**PurusAire I - Allergy and Odor Filter** - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
