

Reducing Smoking Odors is Good for Any Business That Wants to Keep Smokers and Non-Smokers Happy

BOWLING CENTERS

Purifans Boost Customer Satisfaction and Repeat Traffic

What do Our Customers Love About Their Purifans? They Work!

Purifans reduce smoke and odors found in most Bowling Centers. This makes the non-smokers happy, and boosts total revenues, including food and bar sales. Customers want to leave without smelling like smoke.

The Purifan Clean Air System is easy to install. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 foot area 40 times per hour. Purifans make any room healthier and smell fresher. Purifans are the lowest cost solution when you consider purchase cost, filter cost and energy costs. They also last a lifetime!

Reduce Smoke Odors and Boost Sales

Purifans reduce smoking odors that drive people away. Reducing smoking odors can boost bar and food revenues by 20%, 50% even 200% according to our customers.

Purifan is the lowest cost solution when you consider initial cost, filter costs and energy costs. Purifan use 1/2 amp compared to 8 to 10 amps for noisy electrostatic units.

Purifan filters the air up to 40 times per hour, removing unwanted cooking, building, cleaning and smoking odors.

Purifans are ideal for Bowling Centers and Bars because they are quiet. They won't bother talking or activities.

Purifans keep your employees healthier. Fewer sick days for employees because of lower allergens in the air.

Purifans are the ideal solution for smoking sections. Purifans have been chosen by thousands of restaurants and clubs to reduce cigarette smoke and odor.

Bowling Centers have reported a boost in games, food and bars sales after installing Purifans when smoking and non-smoking customers stay longer and return more often.

Your Bowling Center will have less visible dust settling on surfaces making your facility look dirty and poorly maintained. People know the dust is unhealthy and hard on clothes, and reflects poorly on your customer care.

Your satisfied customers will recommend your center to others and this is key to growing any business.

Lower heating and cooling costs. Ceiling fan air movement means no hot or cold spots in the rooms, everyone feels comfortable.

Lifetime warranty if Purifan Filters are used. Electrostatic models often fail in 24 to 36 months, and take 8 to 10 amps of electricity compared to 1/2 amp for Purifan.

What Customers Say About Their Purifans™

"The Air Quality in our center has improved considerably since we installed Purifans in our concourse area six months ago. Many of our bowlers, especially the non-smokers, have noticed quite a difference. The Purifan system looks nice, runs quietly, and is also very efficient. We were amazed at all the dust that had been trapped in the filters the first time they were changed! We also appreciate dealing with a company that delivers excellent customer service."

Pondra H. Byrd
Rainbow Lanes, Clayton, NC

"Bowling Centers are traditionally associated with smoking. Thus, smoking was a problem in our alcohol-free Bowling Center. We noticed a significant problem during our league bowling and senior bowling events. Within 24 hours of the fans being installed, multiple team members from the senior bowling leagues asked if our facility had gone smoke-free. We have noticed that families are bowling more games during their stay and enjoy the clean air inside our center. Purifan has given us an edge on other bowling centers with customer satisfaction and a healthier environment."

Tracy Golding, Co-Owner
Northside Lanes, Winston-Salem, NC

"We have experienced an 11% increase in food and beverage sales and a 145% increase in our bingo hall! All our members have been impressed with how well the Purifans get rid of smoke odors."

Greg Walters
Moose Lodge 17, Indiana

Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory.
Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces smoke, odors, dust, pollen, dander mold spores and other allergen particles and restaurant smells.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire II - Smoke and Odor Filter - For Smoke and Odors, and particle reduction. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
