

Cleaner Air in Your Day Care Will Boost Your Business Success

DAY CARE FACILITIES

Cleaner Air is Good for the Health of Children & Staff

Can Installing Purifans In Your DayCare Business Make It More Competitive and Profitable? Yes! Purifans installed in your DayCare can cut illnesses and sick days for children and staff as much as 50% while giving you a competitive advantage.

The Purifan Clean Air System is easy to install in any DayCare facility or home. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans make your facility a much healthier place to be for the children and your employees. It can give your business a competitive advantage.

Many Benefits for Day Care Centers

An "Allergy-Friendly" DayCare increases your competitive advantage because parents value their children's health.

Some owners ask parents to pay for Purifans to help keep their children healthier, with fewer sick days.

Sick days can be reduced substantially which is the number one complaint by parents about their DayCare. Respiratory related illnesses are the number one cause of absenteeism and healthcare costs for children and adults.

Purifans reduce common day care odors and most people associate odors with a lack of cleanliness.

Attracting just one or two new children because of reduced odors and a reputation for fewer sick days will pay back the entire cost of installing Purifans in a few months.

Keeping current customers happy discourages them from leaving and creates important referrals. Parents will spread the word about your investment in cleaner indoor air quality and the benefits to their children.

Cleaner indoor air quality will reduce the spread of common colds, influenza and other respiratory illnesses that are sometimes transferred by airborne droplets. *CDC

Lower employee health insurance costs by reducing respiratory related illnesses, like allergies and asthma, that cause many employee health care expenses.
*Blue Cross and Blue Shield

Lower heating and cooling costs. No hot or cold spots. HVAC filters will last longer.

Reduce employee absences which cause you to operate short-handed. Employees feel better at work.

Less dusting to keep your facility cleaner.

Reduced risk of catching illnesses from others

What Teachers and Day Care Owners say about Purifans

"Just a note to tell you how much we use and appreciate the Purifan that you installed in our facility. It is very important to us that we offer our children an environment that is as free of particles and dust, as we can manage. We have tried several other methods to achieve this, but nothing we have tried, so far, matches the performance of your remarkable fan. I would certainly recommend this filtration system to other schools and home systems in the area"

Carol Eklund
Director Montessori Children's House, Phoenix, AZ

"I had so many respiratory health problems before the Purifans. My building is only a few years old, but I had so many repeat ear infections I had to have tubes in my ears. My husband begged me to quit for my health. After Purifans were installed in my classroom I never got sick one day. Even more impressive is my 28 pre-school children didn't had even one sick-day from respiratory illnesses all year. That is a miracle for four-year old children. With today's high levels of allergies and asthma in children and teachers, every child care facility should consider installing Purifans."

Glenna Weir
Pre-school Teacher Wichita, KS

"Who would believe you could cut absenteeism by 61% by cleaning up the indoor air quality. Our students feel better and perform better and had an average of 11 fewer sick days each school year. Teachers had 50% fewer sick days too."

Clay Guthmiller
Supt. Leavenworth Schools Leavenworth, KS

Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Helps remove smoke, odors, dust, pollen, mold spores, pet dander and other common allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

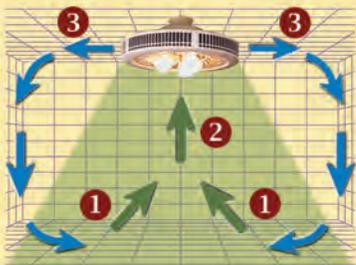

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
