

Reduce Dust and Odors that Cause Problems, Cost Money and Hurt Your Business

# FITNESS FACILITIES

Gyms, Exercise Clubs, Weight Rooms, YMCAs & Locker Rooms

**Most fitness and workout facilities have air quality and odor problems** from particulates, perspiration odors, body odors and breath odors. Now fitness clubs can reduce odors and provide healthier, cleaner, allergy-friendly air quality for members.

**The Purifan Clean Air System is easy to install in any building, even rented buildings,** and can even be easily moved to new locations. Purifans mount to the ceiling, are very quiet, produce comfortable ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Low-cost, energy-efficient Purifans are professionally installed, cleaned and serviced by our Local Purifan Dealers.

## Benefits of Purifans in Fitness Clubs

**Reduces undesirable and unhealthy odors** from workout areas, weight rooms and locker rooms. These odors come from perspiration, breath odors, locker room odors, carpet odors and facility odors. These odors hurt your business.

**Less dust on expensive workout equipment and clogging up motors and cooling fans, less wasted employee time dusting.** Visible dust on equipment projects a reputation of poor cleanliness. Dust clogs up cooling ducts on expensive work-out equipment. Dust clogs HVAC systems increasing utility costs and reduces the cooling efficiency critical to keeping your facility cool during peak customer hours.

**Reduces airborne particulates that are unhealthy for your customer's and staff's respiratory systems.** These microscopic airborne particles include decaying skin cells, lint from towels, human hair, pet dander, insect residue, pollen, mold and many other elements that are unhealthy to breathe deeply into your lungs during exercise.

**Purifans move air like a ceiling fan making the room feel better and will attract more members, boost customer loyalty** and generate more customer referrals.

**Increasing membership and retaining current members will boost revenues and profits.**

**Purifan's quiet air circulation will lower heating and cooling costs.** Eliminates hot or cold spots in the room. Rooms feel more comfortable.

**Reduce staff absenteeism with cleaner indoor air quality.** Respiratory illnesses are the number one cause of employee absenteeism and healthcare costs.

**Cleaner indoor air will reduce the spread of common colds, influenza** and other respiratory illnesses that are sometimes transferred by airborne droplets. \*CDC

**Lifetime warranty.** Low energy and filter costs.

Purifan air is healthier and smells better

## How Purifans Pay for Themselves in a Fitness Club.

*"We compete for members with other fitness clubs by offering an Allergy-Friendly facility. After we installed Purifans, the change in air quality was amazing. Our members love the fresh clean smell in our workout areas. Those with allergies have told us the difference is very noticeable. Healthy air is important, and I believe Purifans make*

*our facility healthier, smell better and give us a competitive advantage. The other major benefit is the reduction in visible dust on our equipment and clogging up air intakes on the motors and cooling fans on our expensive motorized equipment. It saves time spent dusting the equipment, and keeps the equipment looking cleaner. Purifans produced a much better return than most of the advertising I've purchased. They have helped us boost our membership and customer loyalty, and these two items are critical to the financial success and membership levels of any fitness business.*

**Melissa Allen, Owner  
Fitness Center, Elk Grove, CA**

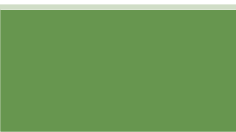

***We have a lot of competitors and we know it is important that we treat our customers right. That is why we installed Purifans.** The dust from nail treatments and make-up areas create a cleaning problem for any DaySpa. The Purifans capture the dust and odors, but the best part is the cool airflow they generate in a room. Our employees can get hot working on clients, but the cooling breeze created by the Purifans is a blessing. We also spend much less time dusting and customers appreciate the clean, fresh smell and equate it to cleanliness. Every Salon or DaySpa owner should install Purifans.*

Also available in Bronze, Pewter and Black

## 5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

**PurusAire I - Allergy and Odor Filter** - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
