

Reduce Sick Days
And Health Costs
Plus Improve Office
Productivity

GOVERNMENT OFFICES

Call & Service Centers, Police, Detention or Clerical Centers

Does the air in your office contribute to your employee's health, sick days and healthcare costs? Yes it does! Purifans can produce a dramatic improvement in employee health and absenteeism in many offices. Purifans help your office run smoother with fewer absent staff.

The Purifan Clean Air System is easy to install in any office, even rented offices, and can be moved to new office locations. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans make any office or business a healthier place for all the employees and visitors.

Benefits of Cleaner Office Air

Reduce your office absenteeism with cleaner indoor air quality. Respiratory related illnesses are the number one cause of employee absenteeism and healthcare costs.

Absenteeism can be reduced by over 50% which is equivalent to a 3% to 5% reduction in payroll for many companies.

Savings generated in just a few months will return more than your investment, and Purifans will pay-off for many years with their lifetime warranty.

Absenteeism can cause projects and work-flow to get behind schedule reducing companies revenues and profits.

Poor indoor air quality increases employee mistakes and errors. The ACAAI* studies show people with allergies and bronchitis make more data entry errors and have more on-the-job accidents. *American College of Allergy, Asthma and Immunology

Improve office productivity because employees who are feeling better, sleep better and use less over-the-counter or prescription drug medicine will perform better.*ACAAI

Cleaner indoor air quality will reduce the spread of common colds, influenza and other respiratory illnesses that are sometimes transferred by airborne droplets. *CDC

Lower health insurance costs by reducing respiratory illnesses like allergies and asthma that cause more than half of most employees health care expenses.

*Blue Cross and Blue Shield

Lower heating and cooling costs. No hot or cold spots anywhere in the room.

Reduce most common office odors, fumes, gasses and chemical odors. Helps employees feel better.

Less dust that harms computers and equipment.

ReOrder Form GVSS 062007

Reduce risk of catching illnesses from visitors

What Owners and Office Managers say about Purifans

"The Purifan made an immediate improvement in the way the office smelled and felt. Before they had installed the third Purifan we made the decision to install more units in other offices. The change in the way the air felt was very dramatic. When 30 call center employees share the same air, it just feels heavy and has an odor. Purifans solved our air quality problem and we strongly recommend Purifans to other companies."

Ray Naeini
Call Center Owner
Enid, OK

According to the U.S. Department of Energy (DOE), improving indoor environments could reduce healthcare costs and sick leave and increase worker performance, resulting in an estimated productivity gain of \$30 billion to \$150 billion annually. The DOE further estimated the potential decrease in adverse health effects from improvements in indoor environments to be 10 percent to 30 percent for infectious lung disease, allergies and asthma; and 20 percent to 50 percent for Sick Building Syndrome symptoms. Whether a building is old or new, the same recirculated air is breathed again and again by the people working in these buildings.

American Lung Association Website

"Who would believe you could cut absenteeism by 61% by cleaning up the indoor air quality. Our students feel better and perform better and it saves about 4,300 sick days for students and teachers each school year."

Clay Guthmiller
Supt. Leavenworth Schools
Leavenworth, KS

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Helps remove smoke, odors, dust, pollen, mold spores, dander and other allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
