

Reduce Dust and Odors that Cause Problems, Cost Money and Hurt Your Business

MINI-MART STORES

Clothing Stores, Gift Stores, Reduce Dust or Odors

Many Mini-mart Stores have dust problems and odors from smoking, food prep or other sources that are bad for their business image and waste staff time dusting.

The Purifan Clean Air System is easy to install in any building, even rented buildings, and can be easily moved to new locations. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans make air healthier for employees and customers. Low-cost, energy-efficient Purifans are professionally installed, cleaned and serviced by Local Authorized Purifan Dealers.

Stores smell better, and have less dust

How Purifans Pay for Themselves in Your Store.

"Many retail stores and Mini-mart stores have a lot of undesirable dust and odors. Dust enters every time doors open, and odors can come from smoking, food preparation, in-store dining areas or customers' body odors. Purifans can save wasted employee time dusting merchandise and shelves. Purifans capture the dust and odors, keeping the store cleaner and

smelling better. Dust in HVAC coils and ducts reduces cooling performance and can cause expensive maintenance issues. Stores spend a lot of money to attract customers. Purifans can improve their shopping experience in your store. Repeat and referral customers are critical to growing any retail business. Purifans will boost profits by helping employees spend more time waiting on customers, stocking shelves and less time dusting. We can provide a list of referrals. Purifans are quiet, and do a great job in Mini-mart stores."

Stan Brannan, President of Purifan

According to the U.S. Department of Energy (DOE), improving buildings and indoor environments could reduce healthcare costs and sick leave and increase worker performance, resulting in an estimated productivity gain of \$30 billion to \$150 billion annually. The DOE further estimated the potential decrease in adverse health effects from improvements in indoor environments to be 10 percent to 30 percent for infectious lung disease, allergies and asthma; and 20 percent to 50 percent for Sick Building Syndrome symptoms. Whether a building is old or new, the same recirculated air is breathed again and again by the people working in these buildings.

Benefits of Cleaner Air in Your Stores

Less dust, less wasted employee time dusting. Dust can clog up HVAC system and increase costs. Customers judge a store as being unclean when they find a lot of dust on merchandise. Dusting requires a lot of employee time.

Merchandise looks old to customers when it is dusty. When customers pick up an item or look at it on the shelf or display rack, dust can make it look old or out of date, making them less likely to buy it.

Reduce smoking, food or cooking odors, fumes, gasses and chemical odors from merchandise. Helps employees and customers feel better and projects a cleaner, fresher smelling image to customers with less work by employees.

Lower heating and cooling costs. Eliminates hot or cold spots. Rooms feel more comfortable at a more energy efficient thermostat setting.

Reduce staff absenteeism with cleaner indoor air quality. Respiratory related illnesses are the number one cause of employee absenteeism and healthcare costs. Purifans also reduce the spread of contagious illnesses like colds and flu to help keep your employees healthy.

Labor cost savings from less dusting alone, will return more than your investment. Purifans will pay-off for your business for many years with their lifetime warranty.

Employees with allergy problems or on a lot of allergy medicine make more mistakes. The ACAAI* studies show people with allergies and bronchitis make more data entry errors and have more on-the-job accidents.

*American College of Allergy, Asthma and Immunology, ACAAI

Lower staff health insurance costs by reducing respiratory illnesses including allergies and asthma.

*Blue Cross and Blue Shield

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
