Do Well When
They Are Sick

SPECIAL EDUCATION

Special Needs Classrooms, Dedicated Facilities

Does the air in your facility impact how the children behave and learn? It certainly does! With Purifans installed in your buildings you can cut allergies and sick days by over 50% giving your teachers and students a much better life.

The Purifan Clean Air System is easy to install in any facility, and it can be moved to new facilities. Low-cost Purifans make no noise and produce ceiling fan airflow while filtering allergens and odors out of the air in a 20 x 20 x 8 foot area 40 times per hour. Purifans make your facility a healthier and low-cost, easy-to-change filters last 3 or 4 months in most facilities.

Reduced risk of catching illnesses from others

What Teachers and Administrators say about Purifans

"We found Purifans at our state convention and started installing them in classrooms. Instructors were amazed at the immediate improvement in odors and the fresh air feeling. Anything you can do to keep special needs children and teachers healthy will improve your school's program. Purifans do what they say, and make a major difference in the health of both the students and teachers in the facility."

**Les Hooper, Facility Manager
HCDE - Houston, TX**

Benefits of Clean Air for Special Ed

Reduce absenteeism with cleaner indoor air quality. Respiratory related illnesses are the number one cause of absenteeism and healthcare costs.

Sick days can be reduced by over 50% for teachers and students if Purifans are properly installed and operated.

In states that fund on attendance, Purifans can generate substantial additional school funding.

When special education children feel better they act better and do better in school. Teachers too!

Special ed teachers get sick much more often because of the poor classroom air quality, odors and hygiene issues with students.

Keeping instructors healthy and at work is important, because finding substitute instructors is more difficult for these children and it is difficult to operate short-handed.

Purifans reduce allergens and odors that contribute to making students and teachers feel bad in the classroom.

Cleaner indoor air quality will reduce the spread of common colds, influenza and other respiratory illnesses that are sometimes transferred by airborne droplets. *CDC

Lower employee health insurance costs because respiratory related illnesses like allergies and asthma cause many recurring health care expenses. *Blue Cross and Blue Shield

Lower heating and cooling costs. No hot or cold spots.

Less dusting to keep your facility clean.

"I had so many respiratory health problems before the Purifans. My building is only a few years old, but I had so many ear infections my doctor put tubes in my eardrums. My husband begged me to quit for my health. After Purifans were installed in my classroom I never got sick even one day. Even more impressive, my 28 pre-school children stayed very healthy, with few respiratory illnesses all year. That is a miracle for four-year old children. With today's high levels of allergies and asthma in children and teachers, every child care facility should consider installing Purifans."

**Glenna Weir
Pre-school Teacher
Wichita, KS**

"Who would believe you could cut absenteeism by 61% by cleaning up the indoor air quality. Our 385 students feel better and perform better and it saves about 4,300 sick days for students and teachers each school year."

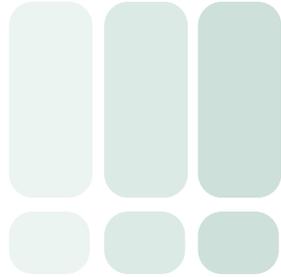

**Clay Guthmiller
Supt. Leavenworth Schools
Leavenworth, KS**

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces dander, odors, dust, pollen, mold spores and other common classroom allergen particles by up to 90%

Low-cost filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
