Keep Studio Air Cleaner and Healthier and Reduce Dust

Will Cleaner Healthier Air in Your Studio Help Your Staff? Absolutely!

The Purifan Clean Air System is easy to install in any building, even rented buildings, and can be easily moved to new locations. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans capture 90-95% of the typical dust that settles on surfaces and gets in the lungs of your staff causing allergies, respiratory illnesses and absenteeism. Low-cost, energy-efficient Purifans are professionally installed, cleaned and serviced by Local Authorized Purifan Dealers.

Benefits of Purifans in Studio Areas

Reduce staff absenteeism with cleaner indoor air quality.

Respiratory related illnesses are the number one cause of employee absenteeism and healthcare costs. Purifans also reduce the spread of contagious illnesses like colds and flu to help keep your employees healthy.

Purifans reduce breath, body and building odors, because working with other people in small rooms make issues with breath and body odors a much bigger problem.

Provides comfortable airflow in the studio while providing healthier air quality. Helps keep voices strong with fewer problems with allergies, congestion and respiratory illnesses. On air talent deserve cleaner air for their voices.

Less dust, less wasted employee time dusting. Dust can also clog up cooling vents on expensive studio equipment and computers. Purifans protect your equipment and reduce time wasted dusting. The facility stays cleaner with less work.

Purifans capture dust that clogs up the HVAC system and increases heating and cooling costs. Dust clogs up coils making the system less efficient and this can damage expensive compressors.

Air motion from Purifan reduces heat coming from equipment. Purifans will circulate the air, cooling equipment and making the room feel cooler.

Employees with allergy problems or on a lot of allergy medicine make more mistakes. The ACAAI* studies show people with allergies and bronchitis make more data entry errors and have more on-the-job accidents. *American College of Allergy, Asthma and Immunology, ACAAI

Lower staff health insurance costs by reducing respiratory illnesses including allergies and asthma.

*Blue Cross and Blue Shield

Reduces The Dust on Expensive Equipment

How Purifans Pay for Themselves in Your Station.

"There are many very talented and expensive employees at every TV and Radio Station. They make money for the station by using their voice. That is why respiratory health is so important for these key employees. Purifans capture the dust, allergens and odors, keeping the air cleaner and healthier for all employees. Purifans are so quiet they operate without being heard in the microphones. Cleaner indoor air helps employees stay healthier, need less allergy medication and improve their alertness, attitude and productivity. Purifans will help any station protect their on-air talent, expensive equipment and employee health. Purifans are also a great addition to sales areas with office cubicles. Keep your sales team healthy and making sales calls. No other air cleaner has the volume and quiet operation of the Purifan. This is a great investment for any radio or TV station manager."

Stan Brannan, President of Purifan

According to the U.S. Department of Energy (DOE), improving buildings and indoor environments could reduce healthcare costs and sick leave and increase worker performance, resulting in an estimated productivity gain of \$30 billion to \$150 billion annually. The DOE further estimated the potential decrease in adverse health effects from improvements in indoor environments to be 10 percent to 30 percent for infectious lung disease, allergies and asthma; and 20 percent to 50 percent for Sick Building Syndrome symptoms. Whether a building is old or new, the same recirculated air is breathed again and again by the people working in these buildings.

Your Indoor Air Pollution Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory. Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
