

Dust Settling on Complex, Fragile Train Layouts Can Be Reduced By Installing Purifans

MODEL TRAINS

Purifans Protect Modelers' Fragile Displays from Dust

What do Train Enthusiasts Love About Their Purifans? Less Dust!

When model train enthusiasts spend all the time and hard work creating the perfect layout, they hate to see the problems and potential damage caused by common dust settling onto their displays. Purifans can help.

The Purifan Clean Air System is easy to install. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 foot area 40 times per hour. Purifans make any room healthier and smell fresher. By capturing dust before it can settle, the room stays much cleaner, and smells better too! Great for your home air quality too!

Protect Your Train Layout from Dust

Purifans are not just for train collectors. Purifans are installed in bars for second-hand smoke, one of the toughest air quality applications. They are great for bedrooms, children's rooms, media rooms, and living rooms. Purifans are also ideal for office or business environments where you want to keep employees healthy with fewer sick days and lower health care costs. Allergies and Asthma are a major contributor to health care costs and missed worked days. The 40 air changes per hour provided by Purifans will help reduce the spread of cold, influenza and other contagious illnesses. That is how Purifans cut sick days in schools and day-cares by over 60%. So if you want an air cleaner that really works, is low cost, low-maintenance, low-noise

Purifans filter the air in 20 x 20 x 8 foot room every 90 seconds. Filters capture particles down to .3 micron. Reducing the need for repeated dusting can protect fragile trees and other typical display items used on model train layouts.

Purifan Five-Stage Filters will normally last 9-12 months in most homes. Filters can be easily changed without any tools and cost only \$40 a set in single quantities.

Purifan is the lowest cost solution when you consider initial cost, filter costs and energy costs.

Purifans are ideal for your train hobby room because they are quiet, and located on the ceiling, out-of-the-way. They won't bother conversations.

With Purifans you will have less visible dust settling on surfaces making your layout look dirty and poorly maintained.

Lower heating and cooling costs. Ceiling fan air movement means no hot or cold spots in the rooms, everyone feels comfortable.

Lifetime warranty if Purifan Filters are used.

What Customers Say About Their Purifans™

"I've always been fascinated by trains. It is a great hobby for young and old.

My biggest frustration was trying to keep the layout clean. The dust just creeps in from everywhere and it is almost impossible to clean the delicate trees and other elements without damaging them. I've tried everything but the Purifan is the best answer I've found. It

not only gets rid of most of the dust, it eliminate the basement odors that have been part of this house since we bought it. I also put one in our bedroom, and in my grandchildren's bedrooms. A great product for your train room or your bedroom. More train and hobby stores need to carry this product."

**Jim Robinson, Retired
Wichita, Kansas**

"Before we installed Purifans I had to dust the classroom daily and clean all the computer screens. After we installed Purifans I only dust about once a month and the computer screens stay dust-free. We love the airflow in the classroom and we have had several students stop needing their inhalers. In the first year average student sick days dropped from 18 to about 7, so the dust is a significant health problem."

**Jim Wolfe, Teacher
Howard Wilson, Leavenworth, KS**

"We want train model collectors to know more about the dust control benefits of Purifans. You invest countless hours making the layout perfect and a few months later the dust creates a huge cleaning problem. We want more hobby stores to carry Purifans. They are great for dusty hobbies."

Pollution
Solution

Matching ceiling fan motor and light kits are available. Many existing ceiling fan motors are compatible with Purifan.

Color Shown: Ivory.
Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
