

Take back the purity of
the air in your home, office,
business or school.

Purifan has Earned 11 Patents Worldwide

©2008 Purifan. Patent #6,004,365. and Eleven More. Other patents pending.

Poor indoor air quality can cause your kids to miss school and you to miss work. The Purifan Clean Air System captures the unwanted and irritating particles that aggravate your allergies, impact your health and contribute to repeat respiratory illness.

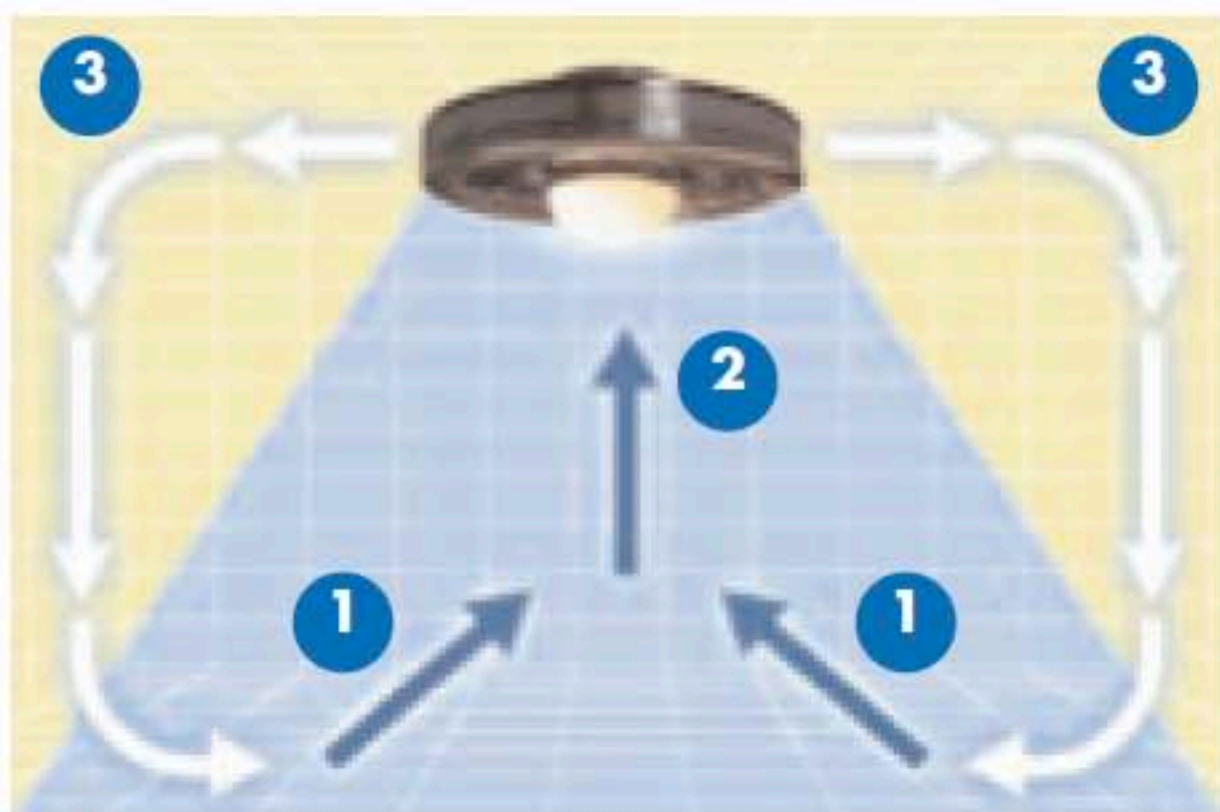

The patented Purifan was scientifically designed to quietly filter the air, and it also creates comfortable, energy-saving airflow in your home while it enhances your lifestyle. Odors vanish. Surface dust and pet hair is reduced. Filtered, fresh, healthier indoor air and lower energy costs are something your family deserves.

“ I have severe allergies as well as asthma. I take two oral tablets and a nasal spray. I also have to carry an emergency shot with me. I normally wake up wheezing and with matted eyes. Since we installed the Purifan, **NO WHEEZING, NO MATTED EYES AND NO RUNNY NOSE!!** ”

— Dort Goodman, Sabetha, Kan.

It's powerful enough for businesses, safe enough for a baby's room.

Purifan's ideal location and air-flow pattern draw dirty air into the hidden filtering system. This 360 degree air-flow pattern is one of the most important reasons Purifan is so effective.

- 1 Contaminated air captured.**
Polluted, particle-filled air is drawn up from the bottom.
- 2 Filtration in action.**
Strategically designed, multi-stage air filtering system removes unhealthy airborne particles and odors.
- 3 Pure air recirculated.**
2,000+ CFM of filtered air is distributed to every corner of the room, pushing dirty air back to the intake area.

No harmful ions or ozone. Purifan's advanced, multi-stage filter technology features a polyester pre-filter to capture bigger particles like dust, carpet fibers and pet hair. An activated carbon filter removes gases and odors. A HEPA filter removes the smallest particles. Custom odor and smoke filters also available.

You can't vacuum or dust enough to clean indoor air.

Your home is under assault. The air you breathe is filled with invisible particles—dust, pet dander, mold spores, pollen, smoke and kitchen odors, germs and bacteria. To fight back, to defend your family against allergies, asthma and respiratory illnesses, you need to purify the air. You wouldn't let your family drink unfiltered water, why let them breathe unfiltered air.

*Ceiling fan motor and light kit can be provided by Purifan or the Customer.

Purifan™ features an advanced, multi-stage air filtering system. It works quietly, overhead and out of the way. The Purifan is used in the harshest environments in thousands of restaurants, bars, schools and nursing homes comes ready to install. Purifan also sells matching motors.

Available in these designer colors:

	IVORY
	BRONZE
	PEWTER
	BLACK

PURIFAN WORKS HARDER, COSTS LESS.

- **Patented Clean Air System.** Purifies all the air in a 20' x 20' x 8' room 40 times an hour. According to the Environmental Protection Agency and American Lung Association, the number of air changes per hour is critical. Purifan's industrial-strength performance reduces allergy and asthma symptoms to help you sleep at night and feel better in the morning.
- **Energy efficient.** Quickly and easily converts an existing 52" to 61" ceiling fan into a high-efficiency, high-volume, high-performance air purifier using no more energy than a 60-watt bulb. Unlike ionic purifiers, Purifan circulates 2000 cubic feet of air per minute. It keeps your home cooler in the summer and warmer in the winter. And it makes less noise than your ceiling fan!
- **Cost-effective.** Unlike other air purifiers that require frequent cleaning or expensive filter changes, Purifan only needs one, low-cost filter change per year! * Filters can be changed in minutes You'll spend less to create a cleaner, more comfortable home.
- **Lifetime warranty.** Well-designed and constructed of high-quality materials, Purifan won't break or wear out. Purifan is a one-time, clean-air investment that will benefit the entire family and your guests!

**based on the average home*

Purifan Is So Powerful It Handles These Commercial Air Filtration Applications

Visit WWW.PURIFAN.COM for details

Bars, Restaurants, Bingo Halls and Casinos - Purifan has been installed in thousands of smoking rooms to reduce the smoke and odors. This keeps customers happy and coming back. It allows smokers and non-smokers to both be happy with the air quality. Cleaner air has helped these businesses boost their customer satisfaction, revenues and profits.

Fraternal or Civic Clubs - Many VFW Posts, American Legions, Moose, Elks, Eagles Lodges and Am-Vet Clubs use Purifans to boost member participation at events, and attract more members to their club. Purifan is the lowest cost smoke solution.

Nursing Homes - Purifans reduce airborne dust, pollen, mold, dander and odors. Reducing the level of airborne particulates has been proven to improve the respiratory and heart health of the elderly, and reduce the spread of contagious illnesses that can devastate the elderly in any nursing home or assisted living facility.

Retail Businesses With Dust and Odors - Purifans capture airborne dust, allergens and odors and can help retail stores, nail salons, day spas, massage centers, warehouse parts operations, pet stores, print shops, alterations shops, motorcycle showrooms and auto repair businesses cleaner with lower levels of dust and odors. Opening merchandise boxes creates more dust and dangerous chemical odors from dyes and fabrics. Employees waste a lot of time and money dusting merchandise and shelves. If they don't dust, customers believe the facility is dirty and the merchandise is old. Dust also clogs HVAC coils lowering efficiency and burning out expensive compressors. The Purifans create the energy-saving air-flow benefits of a ceiling fan, lowering cooling costs, but the air is constantly cleaned to reduce unhealthy dust and odors.

Medical Facilities and Public Waiting Rooms - Purifans capture floating dust that can carry germs and viruses and this can help reduce the spread common contagious illnesses. Ideal for waiting rooms in health clinics, homeless shelters, pharmacies, government offices, medical clinics and hospitals. Also reduces allergy symptoms and undesirable odors.

©2008 Purifan. Patent #6,004,365. Other patents pending.

Most of us associate air pollution with cities and factories. The truth is, indoor air is often more hazardous! And the average person spends 90 percent of his time indoors!

“invisible particles are of concern because they can be inhaled deeply into the lungs...effects may range from eye and lung irritation to more serious effects such as cancer, heart disease and decreased lung function.”

- EPA

Purifan Is So Powerful It Handles These Commercial Air Filtration Applications
