

Reduce Dust and Odors that Cause Problems, Cost Money and Hurt Your Business

RETAIL STORES

Clothing Stores, Gift Stores, Reduce Dust or Odors

Many Retail Stores have excessive dust and odor problems from unpacking merchandise that waste time and money and can harm employee and customer health.

The Purifan Clean Air System is easy to install in any building, even rented buildings, and can even be easily moved to new locations. Purifans mount to the ceiling, make no noise, produce ceiling fan airflow while filtering the air in a 20 x 20 x 8 foot area every 90 seconds. Purifans make air healthier for employees and customers. Low-cost, energy-efficient Purifans are professionally installed, cleaned and serviced by our Local Authorized Purifan Dealers.

Stores smell better, and have less dust

How Purifans Pay for Themselves in Your Store.

"Many retail stores generate a lot of undesirable dust and odors when employees are opening merchandise boxes and preparing the products to go into the display area. Purifans can save wasted employee time dusting and reduce odors. Purifans in the prep area and store area capture the dust and odors, keeping the store cleaner and

smelling better. Dust in HVAC coils and ducts reduces cooling performance and can cause expensive maintenance issues. Stores spend a lot of money to attract customers. Purifans can improve their shopping experience in your store. Repeat and referral customers are critical to growing any retail business. Let us show you how much money Purifans will save your store by helping employees spend their time stocking and selling and less time dusting. If odors and dust are excessive you may have liabilities for health problems for employees and customers. Purifans are a great solution to this problem."

Stan Brannan, President of Purifan

According to the U.S. Department of Energy (DOE), improving buildings and indoor environments could reduce healthcare costs and sick leave and increase worker performance, resulting in an estimated productivity gain of \$30 billion to \$150 billion annually. The DOE further estimated the potential decrease in adverse health effects from improvements in indoor environments to be 10 percent to 30 percent for infectious lung disease, allergies and asthma; and 20 percent to 50 percent for Sick Building Syndrome symptoms. Whether a building is old or new, the same recirculated air is breathed again and again by the people working in these buildings.

Benefits of Cleaner Air in Your Stores

Reduce staff absenteeism with cleaner indoor air quality.

Respiratory related illnesses are the number one cause of employee absenteeism and healthcare costs.

Absenteeism can be reduced by as much as 50% which will typically improve productivity and profits.

Employee sick-days cause projects and work-flow delays reducing companies revenues and profits.

Less dust, less wasted employee time dusting. Dust can clog up HVAC system and increase costs.

Reduce odors, fumes, gasses and chemical odors from merchandise. Helps employees and customers feel better.

Savings generated in just a few months will return more than your investment. Purifans will pay-off for your business for many years with their lifetime warranty.

Employees with allergic problems or on a lot of medicine make more mistakes. The ACAAI* studies show people with allergies and bronchitis make more data entry errors and have more on-the-job accidents. *American College of Allergy, Asthma and Immunology, ACAAI

Improve staff productivity because employees who feel better, sleep better and use less over-the-counter or prescription drug medicine will perform better. *ACAAI

Cleaner indoor air will reduce the spread of common colds, influenza and other respiratory illnesses that are sometimes transferred by airborne droplets. *CDC

Lower health insurance costs by reducing respiratory illnesses like allergies and asthma.

*Blue Cross and Blue Shield

Lower heating and cooling costs. Eliminates hot or cold spots. Rooms feel more comfortable.

Also available in Bronze, Pewter and Black

5-Stage Advanced Filtering System

Reduces odors, smoke, dust, pollen, pet dander, mold spores and other common office allergen particles.

Advanced Filters tuck snugly inside the Purifan and are easily replaced.

PurusAire I - Allergy and Odor Filter - For Allergy, Asthma and removing airborne allergens. Filter life depends facility situation.

The Purifan Clean Air System is the ideal indoor air pollution solution for homes, schools, day care centers, nursing homes, offices and smoke removal applications, delivering volumes of clean, odor-free air to any room. The Purifan installs easily just like a ceiling fan. The Purifan still circulates the air providing cooling and heating benefits for your facility. The only difference is... **THE PURIFAN SYSTEM FILTERS THE AIR** through the hidden Advanced Filter System trapping millions of floating allergen particles, releasing over 2,000 CFM of fresh, clean breathable air. The whole-room air flow pattern cleans every corner of a typical 20 x 20 foot room 40 times per hour. This is 20 to 100 times more clean air than popular floor or shelf models.

A Purifan is quiet, out-of-the-way, uses only 60 watts of electricity and requires little maintenance. It can be installed on most 4 or 5-bladed 52-inch ceiling fans, with or without a light kit. It comes with the first set of filters and a lifetime limited warranty if only Purifan filters are used. Purifans are the lowest cost solution that really works. Our local Purifan Product Specialists are trained to install and service your Purifans.
