

Purifan™ features an advanced, five-stage air filtering system. Air contaminated with smoke, dust, odors and gases, pollen, mold spores and particles is captured and purified. Purifan works quietly, overhead and out of the way.

*Light kit not included.

Available in these colors:

CLEAN AIR CLEARS THE WAY TO PROFIT.

With 46 million smokers blowing offensive odors and harmful secondhand smoke into the air, the battle to keep smokers and non-smokers happy can feel like a no-win situation. Purifan enhances your guest experience to keep your profits from going up in smoke!

Join the thousands of Purifan users in bars, clubs, restaurants, homes, schools, nursing homes and offices around the country. Take back pure air.

“I'm more satisfied with Purifan than anything I've ever used. We have 22 locations, with three or four systems in each location. Customers want to know where they can find them for their homes.”

— Bill Baugh, Shanny's Restaurants, Knoxville, Tenn.

- **Patented Clean Air System.** Purifies a 20' x 20' x 8' room 40 times an hour so guests stay longer, spend more and return more often.
- **Energy efficient.** Converts an existing 52" ceiling fan into a high-efficiency, high-volume, high-performance air purifier. Purifan costs less to buy and maintain and it works harder. That translates to more revenue!
- **Lifetime warranty.** Purifan won't break or wear out. Purifan is a one-time, clean-air decision. No second efforts!

Turn it on and Purifan's hidden filters go to work.

Purifan uses high- and low-air pressure to draw air into the filtering system. Unobtrusive and outlasted systems use high-speed motors that generate noise and vibrations.

- 1 Contaminated air captured.**
Polluted, particle-filled air is drawn up from the bottom.
- 2 Filtration in action.**
Strategically designed, five-stage air filtering system removes minute, airborne particles.
- 3 Pure air recirculated.**
Fresh air is channeled back into the room and recirculated for refreshing, clean air comfort.

Advanced, nanoparticle filter technology is safe! No harmful ions or ozone. Filters can be changed in minutes!

Before.

After.

Authorized Purifan™ Distributor

Cigarette smoke is a serious drag on business.

You can serve the best steak and the coldest beer in town, but if cigarette smoke and cooking odors are destroying the air quality in your establishment, count on kissing business goodbye. Purifan cleans the air to clear the way to higher profits. It turns "let's get out of here" into "let's order another round."

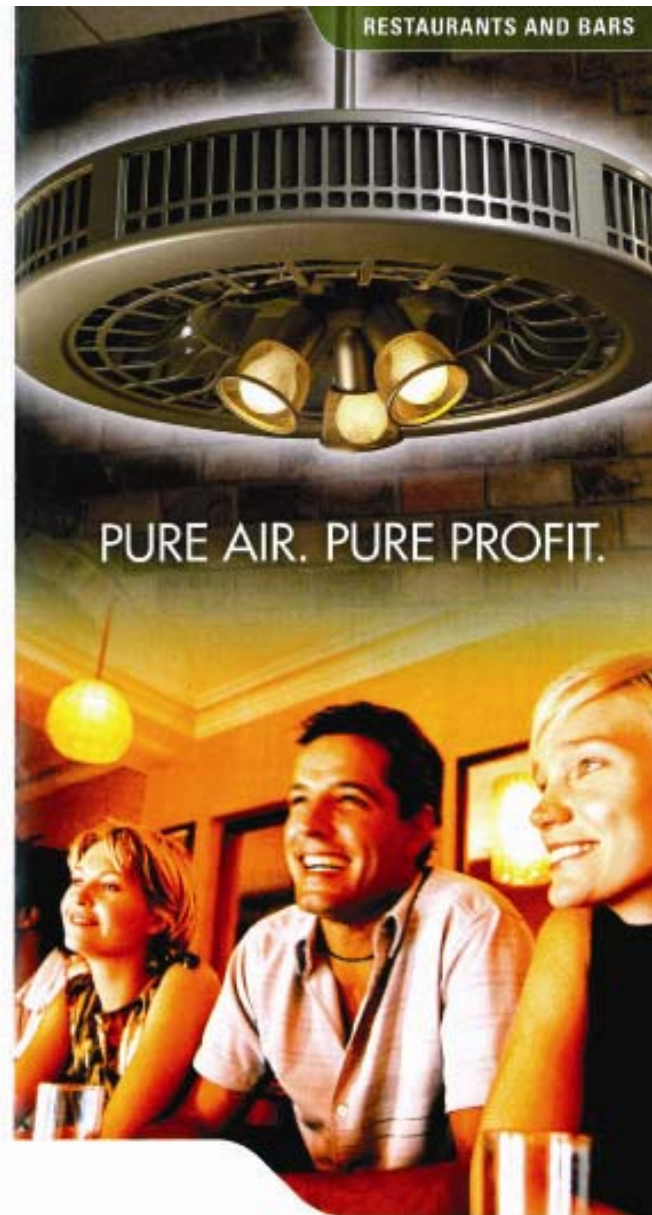

©2008 Hayward Technologies. Patent # 6,908,208. Other patents pending.

“Since putting in Purifans, my food and beverage sales are up 11 percent. My bingo hall revenues are up 145 percent. Business has never been so good thanks to Purifan.”

— Doug Walters, Indiana Bingo Lodge
